

## IS DETOXIFICATION MEDICALLY NECESSARY?

More than six billion pounds of environmental and chemical compounds were added to our air, soil and water in the year 2000 (the last year for which data is available). The combination of all that toxicity immerses you in a virtual soup that can degrade or even shorten your life. Degenerative diseases such as cancer, heart disease and diabetes can be linked to unhealthy levels of toxic elements in the body.

Example of heavy metals effect on the body.

HEAVY METALS	EFFECTS ON THE HUMAN BODY
Lead	Central nervous system (CNS), kidneys, cardiovascular; bone
Cadmium	CNS, kidneys, cardiovascular; liver; reproductive disorders, bone
Arsenic	CNS, peripheral neuropathy, headache, drowsiness, confusion, skin/lung/liver cancer
Aluminum	CNS, impaired GI motility and absorption of other elements, progressive dementia
Mercury	CNS, thyroid, liver, kidneys, eyes
Uranium	CNS, kidneys, seizures

## CONDITIONS TREATED

DetoxAmerica developed its Comprehensive Wellness System to help patients stay healthy and in the treatment of those suffering from:

- Heart disease
- Cancer
- Diabetes
- Obesity
- Fibromyalgia
- Chronic Fatigue Syndrome
- Chronic stress
- Lack of energy
- Chronic Pain (sciatica, back, arthritis, rheumatism, joint stiffness, strained muscles and tendons,)
- Slow metabolism
- Brain fog

Elevating temperatures of the subcutaneous layers expands blood capillaries, improves lymphatic flow and blood circulation, increases metabolism, promotes regeneration of tissue, and reduces cramping in muscle fibers.

## WHAT MAKES THIS WELLNESS SYSTEM SO DIFFERENT?

DetoxAmerica's comprehensive approach to health focuses on ridding the body of environmental and chemical toxins. It uses a unique combination of far infrared (FIR) heat and a potent sterilizing system called an ozone generator. Additionally, the system includes magnet therapy (for balancing energy/meridians in the body) and a FIR heating pad for focused treatment of pain.

FIR heat is superior to conventional hot rock or steam heat because infrared penetrates nearly two inches below the skin's surface reaching the cellular level. FIR warms the cells and creates a type of "micro-friction" that releases toxins, which exit the body through sweating.

DetoxAmerica's system is also ozone infused. Environmentally safe, ozone (O<sub>3</sub>) is a very powerful antibacterial, germicidal and anti-fungal agent. Combined with FIR waves, ozone helps combat toxicity at the cellular level and boost the immune system.
